Producer declares that for R-phrases not mentioned in chapters 3, the entire amount of hazardous substances is below limits. For components with an occupational threshold limit value see chapter 8.

If multiple components with identical identifiers appear, these have different hazardous properties, e.g. flashpoint.

### 4. FIRST AID MEASURES

General advice	: When symptoms persist or in all cases of doubt seek medical advice. Never give anything by mouth to an unconscious person.
Eye contact	: Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice.
Skin contact	: Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Inhalation	<ul> <li>Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice.</li> </ul>
Ingestion	: If accidently swallowed obtain immediate medical attention. Keep at rest. Do NOT induce vomiting.
Burns	: If spills on clothing catch fire, wash with plenty of water. Remove loose clothing. Do not remove clothing that has melted to the skin.Obtain medical attention.

### 5. FIRE-FIGHTING MEASURES

Specific hazards during fire fighting Special protective equipment	<ul> <li>As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains or water courses.</li> <li>In the event of fire, wear self-contained breathing apparatus.</li> </ul>
for fire-fighters	3 11
Suitable extinguishing media	: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Keep containers and surroundings cool with water spray.
Extinguishing media which shall not be used for safety reasons	: Do NOT use water jet.

Print Date 6/2/2010 Revision date 29-06-09

Personal precautions	: Use personal protective equipment. Ventilate the area. Refer to protective
	measures listed in sections 7 and 8. Wear respiratory protection. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. Remove all sources of ignition.
Environmental precautions	: Try to prevent the material from entering drains or water ways. If the product contaminates rivers and lakes or drains inform respective authorities.
Methods for cleaning up	<ul> <li>Clean with detergents. Avoid solvents. Contain and collect spillage with non- combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).</li> </ul>
Additional advice	: Refer to section 15 for specific national regulation.
ANDLING AND STORAGE	
Handling	
Safe handling advice	: Avoid exceeding of the given occupational exposure limits (see section 8). Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application area. Avoid inhalation of vapour or mist. For personal protection see section 8.
Advice on protection against ïre and explosion	: Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. When transferring from one container to another apply earthing measures and use conductive hose material. No sparking tools should be used. Operators should wear anti-static footwear and clothing and floors should be of the conducting type. Isolate from sources of heat, sparks and open flame. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. No smoking. The accumulation of contaminated rags and dry overspray, particularly in spray booth filters, may result in spontaneous combustion. Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.
Storage	
Requirements for storage areas and containers	: Observe label precautions. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and 30°C (41 - 86 F) in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store in accordance with the particular national regulations (see section 15).
Advice on common storage	: Keep away from oxidising agents and strongly acid or alkaline materials.

OXICOLOGICAL INFORMATI	ON
Product information	: There is no data available for this product.
	The preparation has been assessed following the conventional method of the
	Dangerous Preparations Directive 1999/45/EC and classified for
A outo anal torrigity	toxicological hazards accordingly. See Sections 3 and 15 for details.
Acute oral toxicity	: May cause nausea, abdominal spasms and irritation of the mucous membranes.
Acute inhalation toxicity	: Exposure to component solvent vapours concentration in excess of the stated
rease initiation toalety	occupational exposure limit may result in adverse health effects. Such as:
	mucous membrane irritation, respiratory system irritation, adverse effects on
	kidney, liver and central nervous system. Symptoms and signs: headache,
	dizziness, fatigue, muscular weakness, drowsiness and in extreme cases loss
	of consciousness.
Skin irritation	: Repeated or prolonged contact with the preparation may cause removal of
	natural fat from the skin resulting in desiccation of the skin. The product may
	be absorbed through the skin.
Eye contact	: Irritating to eyes.
Further information	: There is no data available for this product.

ECOLOGICAL INFORMATIO	N				
Further information	: No data is available on the product itself. The preparation has been assessed following the conventional method of the Dangerous Preparations Directive 1999/45/EC and is classified for ecotoxicological properties accordingly. See sections 3 and 15 for details. The product should not be allowed to enter drains, water courses or the soil.				
DISPOSAL CONSIDERATION	NS				
Product	: The product should not be allowed to enter drains, water courses or the soil. Disposal together with normal waste is not allowed. Special disposal required according to local regulations.				
Waste key for the unused product	: The European Waste Catalogue classification of this product, when disposed of as waste is:				
	08 01 11 Waste paint and varnish containing organic solvents or other dangerous substances.				
	If this product is fully cured or mixed with other wastes, this code may no longer apply. If mixed with other wastes, the appropriate code should be assigned. For further information contact your local waste authority

## AMERCOAT 138 RESIN

MSDS EU 01 / EN Version 2

### **15. REGULATORY INFORMATION**

The product is classified and labelled in accordance with Directive 1999/45/EC.

#### Hazardous components which must be listed on the label:

- toluene
- reaction product: bisphenol-A-(epichlorhydrin); epoxy resin (number average molecular weight 700 < MW < 1000)</li>

R-phrase(s)	: R11	Highly flammable.
	R36/38	Irritating to eyes and skin.
	R43	May cause sensitization by skin contact.
	R48/20	Harmful: danger of serious damage to health by
		prolonged exposure through inhalation.
	R52/53	Harmful to aquatic organisms, may cause long-term
	1(32/33	adverse effects in the aquatic environment.
	R63	Possible risk of harm to the unborn child.
	R65	Harmful: may cause lung damage if swallowed.
	R67	Vapours may cause drowsiness and dizziness.
11		
<b>•</b> •••••••••		
S-phrase(s)	: S53	Avoid exposure - obtain special instructions before
		use.
	S23	Do not breathe spray.
	S36/37	Wear suitable protective clothing and gloves.
	<b>S</b> 38	In case of insufficient ventilation, wear suitable
		respiratory equipment.
	S61	Avoid release to the environment. Refer to special
	501	instructions/ Safety data sheets.
	S62	2
	302	If swallowed, do not induce vomiting: seek medical
		advice immediately and show this container or label.
11		

The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

#### National legislation

#### 16. OTHER INFORMATION

#### Explanation of R-phrases mentioned in section 3

ethyl acetate	R11	Highly flammable.
-	R36	Irritating to eyes.
	R66	Repeated exposure may cause skin dryness or cracking.
	R67	Vapours may cause drowsiness and dizziness.
isopropanol	R11	Highly flammable.
	R36	Irritating to eyes.
	R67	Vapours may cause drowsiness and dizziness.
toluene	R11	Highly flammable.
	R38	Irritating to skin.
	R48/20	Harmful: danger of serious damage to health by prolonged exposure through inhalation.
	R63	Possible risk of harm to the unborn child.
	R65	Harmful: may cause lung damage if swallowed.
	R67	Vapours may cause drowsiness and dizziness.
xylene	R10	Flammable.
	R20/21	Harmful by inhalation and in contact with skin.
	R38	Irritating to skin.
Trizinc bis(orthophosphate)	R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
reaction product: bisphenol-A-	R43	May cause sensitization by skin contact.
(epichlorhydrin); epoxy resin (number	R36/38	Irritating to eyes and skin.
average molecular weight 700 < MW < 1000)		

This Safety Data Sheet is based on the Safety Data Sheets obtained from the producer/manufacturer or/and internet databases and valid regulations considering hazardous substances/preparations.

Training advice:

Persons taking part in a turnover of hazardous products ought to be trained in product handling, safety and hygiene.

Drivers ought to be trained and obtain a certificate in accordance with the requirements of transport regulations (ADR).

#### Version: 2

#### Revision date 29.06.2009

The information contained in this safety data sheet is based on the present state of knowledge and current European and National legislation at the date of issue. The supplier reserves the right to modify data on the safety data sheet without further notice. Any change in data will normally be followed by the issue of a new safety data sheet. The user should check the date of issue and if more than 12 months have elapsed, then the data should only be used after checking with the nearest sales office of the supplier to establish that the data is still valid. As the specific conditions of use of the product are outside the suppliers control, the supplier is not reponsible for the (negative) consequences of these specific conditions of use, which are outside of the suppliers control and which are not compliant with the handling, storage and other instructions in this safety data sheet.

After all component(s) stated on the relevant Technical Data Sheet have been mixed the safety precautions mentioned on each of the component(s) safety data sheets and labels should be used in assessing the safety precautions of the mixed product.
