2. HAZARDS IDENTIFICATION

Symbol(s) : Toxic Dangerous for the environment

Hazardous components :

4,4'-diaminodiphenylmethane benzyl alcohol formaldehyde, oligomeric reaction products with aniline, reaction products with butan-10l and 1-chloro-2,3epoxypropane

R-phrase(s) :

MAY CAUSE CANCER. ALSO HARMFUL BY INHALATION AND IF SWALLOWED. ALSO TOXIC: DANGER OF VERY SERIOUS IRREVERSIBLE EFFECTS THROUGH INHALATION, IN CONTACT WITH SKIN AND IF SWALLOWED. ALSO HARMFUL: DANGER OF SERIOUS DAMAGE TO HEALTH BY PROLONGED EXPOSURE THROUGH INHALATION, IN CONTACT WITH SKIN AND IF SWALLOWED. POSSIBLE RISK OF IRREVERSIBLE EFFECTS. MAY CAUSE SENSITIZATION BY SKIN CONTACT. TOXIC TO AQUATIC ORGANISMS, MAY CAUSE LONG-TERM ADVERSE EFFECTS IN THE AQUATIC ENVIRONMENT. **P-phrase(s) :** Restricted to professional users.

PPG PPG Protecti

Marine Coatings AMERCOAT 352 GF CURE MSDS EU 01 / EN Version 1 Print Date 5/29/2010 Revision date 28-05-10 **Environmental precautions** Try to prevent the material from entering drains or water ways. If the product contaminates rivers and lakes or drains inform respective authorities. Clean with detergents. Avoid solvents. Contain and collect spillage with non-Methods for cleaning up combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Additional advice Refer to section 15 for specific national regulation. 7. HANDLING AND STORAGE Handling Avoid exceeding of the given occupational exposure limits (see section 8). Safe handling advice Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application area. Avoid inhalation of vapour or mist. For personal protection see section 8. Advice on protection against Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure fire and explosion limits. When transferring from one container to another apply earthing measures and use conductive hose material. No sparking tools should be used. Operators should wear anti-static footwear and clothing and floors should be of the conducting type. Isolate from sources of heat, sparks and open flame. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. No smoking. The accumulation of contaminated rags and dry overspray, particularly in spray booth filters, may result in spontaneous combustion. Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards. Storage **Requirements for storage areas** Observe label precautions. Prevent unauthorized access. Containers which and containers are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and 30°C (41 - 86 F) in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store in accordance with the particular national regulations (see section 15). Advice on common storage Keep away from oxidising agents and strongly acid or alkaline materials. 8. EXPOSURE CONTROLS/PERSONAL PROTECTION Components on the national list and/or the European TLV list (98/24/EC): Components CAS-No. Value Value Basis $[mg/m^3]$ [ppm] Personal protective equipment General advice

AMERCOAT 352 GF CURE

MSDS EU 01 / EN Version 1

PPG Protective & Marine Coatings

Print Date 5/29/2010 Revision date 28-05-10

Respiratory protection	:	When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikly to be sufficient to control particulates and solvent vapour in all cases. In such circumstances they should wear a compressed air- fed respirator during the spraying process and until such time as the particulates and solvent vapour concentration has fallen below the exposure
Hand protection	:	limits. For prolonged or repeated contact use protective gloves. Barrier creams may help to protect the exposed areas of skin, they should however not be applied once exposure has occurred. Skin should be washed after contact. Use chemical resistant gloves classified under Standard EN 374: Protective gloves against chemicals and micro-organisms.
		Recommended gloves: butyl-rubber Minimum breakthrough time: 480 min
		The recommended gloves are based on most common solvent in this product.
		When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled,physicalrequirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove supplier.
Eye protection Skin and body protection	:	Chemical resistant goggles must be worn. Personnel should wear protective clothing. Skin should be washed after contact. Working clothes must not consist of textiles, which show a dangerous melting behaviour in case of fire. Workers should wear antistatic footwear.
Additional advice		
Environmental protection	:	Refer to national regulations in chapter 15 for regulations on environmental protection.
Personal protection Protective equipment	:	Special work instructions

15. REGULATORY INFORMATION

The product is classified and labelled in accordance with Directive 1999/45/EC.

Dangerous for the environment

Hazardous components which must be listed on the label:

- 4,4'-diaminodiphenylmethane
- benzyl alcohol
- formaldehyde, oligomeric reaction products with aniline, reaction products with butan-1ol and 1-chloro-2,3epoxypropane

R-phrase(s)	: R45 R20/22 R39/23/24/25	May cause cancer. Also harmful by inhalation and if swallowed. Also toxic: danger of very serious irreversible effects through inhalation, in contact with skin and if swallowed.
	R48/20/21/22	Also harmful: danger of serious damage to health by prolonged exposure through inhalation, in contact with skin and if swallowed.
	R68	Possible risk of irreversible effects.
	R43	May cause sensitization by skin contact.
	R51/53	Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
S-phrase(s)	: S53	Avoid exposure - obtain special instructions before use.
	S23	Do not breathe spray.
	S36/37	Wear suitable protective clothing and gloves.
	S38	In case of insufficient ventilation, wear suitable respiratory equipment.
	S45	In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).
	S61	Avoid release to the environment. Refer to special instructions/ Safety data sheets.
P-phrase(s)	: Restricte	ed to professional users.

The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

National legislation

	R43	May cause sensitization by skin contact.
	R48/20/21/22	Harmful: danger of serious damage to health by prolonged exposure through inhalation, in contact with skin and if swallowed.
	R68	Possible risk of irreversible effects.
	R51/53	Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
formaldehyde, oligomeric reaction	R21/22	Harmful in contact with skin and if swallowed.
products with aniline, reaction products with butan-10l and 1-chloro-2,3- epoxypropane	R43	May cause sensitization by skin contact.

This Safety Data Sheet is based on the Safety Data Sheets obtained from the producer/manufacturer or/and internet databases and valid regulations considering hazardous substances/preparations.

Training advice:

Persons taking part in a turnover of hazardous products ought to be trained in product handling, safety and hygiene.

Drivers ought to be trained and obtain a certificate in accordance with the requirements of transport regulations (ADR).

Version: 1

Revision date 28.05.2010

The information contained in this safety data sheet is based on the present state of knowledge and current European and National legislation at the date of issue. The supplier reserves the right to modify data on the safety data sheet without further notice. Any change in data will normally be followed by the issue of a new safety data sheet. The user should check the date of issue and if more than 12 months have elapsed, then the data should only be used after checking with the nearest sales office of the supplier to establish that the data is still valid. As the specific conditions of use of the product are outside the suppliers control, the supplier is not reponsible for the (negative) consequences of these specific conditions of use, which are outside of the suppliers control and which are not compliant with the handling, storage and other instructions in this safety data sheet.

After all component(s) stated on the relevant Technical Data Sheet have been mixed the safety precautions mentioned on each of the component(s) safety data sheets and labels should be used in assessing the safety precautions of the mixed product.
