| 2-methoxy-1-methylethyl acetate | 203-603-9 | 108-65-6   | 08<br>2009 |        | R10                               | >=25.00 - <50.00% |
| 2-methoxypropyl acetate         | 274-724-2 | 70657-70-4 | 12<br>2008 |        | R10<br>Repr.Cat.2; R61<br>Xi; R37 | >=0.10 - <0.50%   |

Producer declares that for R-phrases not mentioned in chapters 3, the entire amount of hazardous substances is below limits. For components with an occupational threshold limit value see chapter 8.

If multiple components with identical identifiers appear, these have different hazardous properties, e.g. flashpoint.

#### 4. FIRST AID MEASURES

|  | • | give anything by mouth to an unconscious person.   |  |  |  |
|--|---|--|--|--|--|
| Eye contact  | : | Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice.   |  |  |  |
| Skin contact   | : | Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |  |  |  |
| Inhalation   | : | Remove to fresh air. Keep patient warm and at rest. If breathing is irregular<br>or stopped, administer artificial respiration. If unconscious place in recovery<br>position and seek medical advice.  |  |  |  |
| Ingestion  | : | If accidently swallowed obtain immediate medical attention. Keep at rest. Do<br>NOT induce vomiting.   |  |  |  |
| Burns  |   | <ul> <li>NOT induce vomiting.</li> <li>If spills on clothing catch fire, wash with plenty of water. Remove loos clothing. Do not remove clothing that has melted to the skin.Obtain me attention.</li> </ul>   |  |  |  |
|  |   | attention.   |  |  |  |
| IRE-FIGHTING MEASURES<br>Specific hazards during fire<br>fighting        | : | As the product contains combustible organic components, fire will produce<br>dense black smoke containing hazardous products of combustion (see section  |  |  |  |
| Specific hazards during fire   | : | As the product contains combustible organic components, fire will produce<br>dense black smoke containing hazardous products of combustion (see sectior<br>10). Exposure to decomposition products may be a hazard to health. Cool<br>closed containers exposed to fire with water spray. Do not allow run-off from  |  |  |  |
| Specific hazards during fire<br>fighting<br>Special protective equipment | : | As the product contains combustible organic components, fire will produce<br>dense black smoke containing hazardous products of combustion (see sectior<br>10). Exposure to decomposition products may be a hazard to health. Cool   |  |  |  |
| Specific hazards during fire   |   | As the product contains combustible organic components, fire will produce<br>dense black smoke containing hazardous products of combustion (see sectior<br>10). Exposure to decomposition products may be a hazard to health. Cool<br>closed containers exposed to fire with water spray. Do not allow run-off from<br>fire fighting to enter drains or water courses. |  |  |  |

#### 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions      | : Use personal protective equipment. Ventilate the area. Refer to protective measures listed in sections 7 and 8. Wear respiratory protection. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. Remove all sources of ignition.              |
|---------------------------|---|
| Environmental precautions | : Try to prevent the material from entering drains or water ways. If the product contaminates rivers and lakes or drains inform respective authorities.   |
| Methods for cleaning up   | <ul> <li>Clean with detergents. Avoid solvents. Contain and collect spillage with non-<br/>combustible absorbent material, (e.g. sand, earth, diatomaceous earth,<br/>vermiculite) and place in container for disposal according to local / national<br/>regulations (see section 13).</li> </ul> |
| Additional advice         | : Refer to section 15 for specific national regulation.   |

#### 7. HANDLING AND STORAGE

#### Handling

| Safe handling advice | : Avoid exceeding of the given occupational exposure limits (see section 8).<br>Use only in area provided with appropriate exhaust ventilation. Avoid contact<br>with skin, eyes and clothing. Smoking, eating and drinking should be<br>prohibited in the application area. Avoid inhalation of vapour or mist. For<br>personal protection see section 8. |

# AMERCOAT 891 (LEAD CONTAINING)

MSDS EU 01 / EN Version 1

PPG Protective & Marine Coatings

Print Date 5/29/2010 Revision date 28-05-10

| Advice on protection against<br>fire and explosion | : | Prevent the creation of flammable or explosive concentrations of vapour in<br>air and avoid vapour concentration higher than the occupational exposure<br>limits. When transferring from one container to another apply earthing<br>measures and use conductive hose material. No sparking tools should be<br>used. Operators should wear anti-static footwear and clothing and floors<br>should be of the conducting type. Isolate from sources of heat, sparks and<br>open flame. Take necessary action to avoid static electricity discharge (which<br>might cause ignition of organic vapours). The product should only be used in<br>areas from which all naked lights and other sources of ignition have been<br>excluded. No smoking. The accumulation of contaminated rags and dry<br>overspray, particularly in spray booth filters, may result in spontaneous<br>combustion. Good housekeeping standards, regular safe removal of waste<br>materials and regular maintenance of spray booth filters will minimise the<br>risks of spontaneous combustion and other fire hazards. |
|--|---|--|
| Storage  |   |  |
| Requirements for storage areas<br>and containers   | : | Observe label precautions. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and $30^{\circ}$ C (41 - 86 F) in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store in accordance with the particular national regulations (see section 15).  |
| Advice on common storage                           | : | Keep away from oxidising agents and strongly acid or alkaline materials.   |

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### Components on the national list and/or the European TLV list (98/24/EC):

#### Personal protective equipment

General advice

**Respiratory protection** 

: When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikly to be sufficient to control particulates and solvent vapour in all cases. In such circumstances they should wear a compressed airfed respirator during the spraying process and until such time as the particulates and solvent vapour concentration has fallen below the exposure limits.

PPG Protective & Marine Coatings

Print Date 5/29/2010 Revision date 28-05-10

| Hand protection                               | :       | For prolonged or repeated contact use protective gloves.<br>Barrier creams may help to protect the exposed areas of skin, they should<br>however not be applied once exposure has occurred.<br>Skin should be washed after contact.<br>Use chemical resistant gloves classified under Standard EN 374: Protective<br>gloves against chemicals and micro-organisms.  |
|---|---------|---|
|   |         | Recommended gloves: butyl-rubber<br>Minimum breakthrough time: 480 min  |
|   |         | The recommended gloves are based on most common solvent in this product.  |
|   |         | When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended.<br>NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled,physicalrequirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glovematerials, as wellas the instructions/specifications provided by the glove supplier. |
| Eye protection<br>Skin and body protection    | :       | Chemical resistant goggles must be worn.<br>Personnel should wear protective clothing. Skin should be washed after<br>contact. Working clothes must not consist of textiles, which show a<br>dangerous melting behaviour in case of fire. Workers should wear antistatic<br>footwear.   |
| Additional advice<br>Environmental protection | :       | Refer to national regulations in chapter 15 for regulations on environmental  |

## AMERCOAT 891 (LEAD CONTAINING)

MSDS EU 01 / EN Version 1

Print Date 5/29/2010 Revision date 28-05-10

The information contained in this safety data sheet is based on the present state of knowledge and current European and National legislation at the date of issue. The supplier reserves the right to modify data on the safety data sheet without further notice. Any change in data will normally be followed by the issue of a new safety data sheet. The user should check the date of issue and if more than 12 months have elapsed, then the data should only be used after checking with the nearest sales office of the supplier to establish that the data is still valid. As the specific conditions of use of the product are outside the suppliers control, the supplier is not reponsible for the (negative) consequences of these specific conditions of use, which are outside of the suppliers control and which are not compliant with the handling, storage and other instructions in this safety data sheet.

After all component(s) stated on the relevant Technical Data Sheet have been mixed the safety precautions mentioned on each of the component(s) safety data sheets and labels should be used in assessing the safety precautions of the mixed product.
