

## AMERCOAT 240 CURE

MSDS EU 01 / EN Version 2

Print Date 6/16/2010 Revision date 29-06-09

. IDENTIFICATION OF THE SUB	CE/PREPARATION AND OF THE COMPANY/U	NDERTAKING
Product information		
Trade name	AMERCOAT 240 CURE	
Recommended use	coating	
Company	PPG Coatings SPRL/BVBA Noordersingel 23 B-2040 Borgerhout	
Telephone	+32 3 3606470	
Telefax	+32 3 3606435	
Emergency telephone number	+31 20 4075210	
E-mail address	PMC.Safety@PPG.com	

#### 2. HAZARDS IDENTIFICATION

Symbol(s) : Harmful

> Hazardous components : aralkylpolyamine ethylenediamine diethylenetriamine

**R-phrase(s) :** FLAMMABLE. IRRITATING TO SKIN. RISK OF SERIOUS DAMAGE TO EYES. MAY CAUSE SENSITIZATION BY INHALATION AND SKIN CONTACT.

#### 3. COMPOSITION/INFORMATION ON INGREDIENTS

Components	EC No.	CAS-No.	DSD	Note	Classification	Concentration
n-butanol	200-751-6	71-36-3	25th		R10 Xn; R22 Xi; R37/38, R41 R67	>=5.00 - <10.00%
diethylenetriamine	203-865-4	111-40-0	19th		Xn; R21/22 C; R34 R43	>=1.00 - <2.50%
ethylenediamine	203-468-6	107-15-3	22nd		R10 Xn; R21/22 C; R34 R42/43	>=2.50 - <10.00%

рРG SAFETY DATA SHEET This Safety Data Sheet is prepared in accordance with Annex II to Regulation (EC) No. 1907/2006. PPG Protective & Marine Coatings AMERCOAT 240 CURE MSDS EU 01 / EN Version 2 Print Date 6/16/2010 Revision date 29-06-09 aralkylpolyamine Xi; R36/38 >=50.00 - <75.00% R42 R43 Producer declares that for R-phrases not mentioned in chapters 3, the entire amount of hazardous substances is below limits. For components with an occupational threshold limit value see chapter 8. If multiple components with identical identifiers appear, these have different hazardous properties, e.g. flashpoint. 4. FIRST AID MEASURES General advice When symptoms persist or in all cases of doubt seek medical advice. Never : give anything by mouth to an unconscious person. Eye contact Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice. Skin contact Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. Inhalation Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice. Ingestion If accidently swallowed obtain immediate medical attention. Keep at rest. Do NOT induce vomiting. Burns If spills on clothing catch fire, wash with plenty of water. Remove loose clothing. Do not remove clothing that has melted to the skin.Obtain medical attention. 5. FIRE-FIGHTING MEASURES Specific hazards during fire As the product contains combustible organic components, fire will produce fighting dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains or water courses. Special protective equipment In the event of fire, wear self-contained breathing apparatus. for fire-fighters Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Suitable extinguishing media Keep containers and surroundings cool with water spray. Do NOT use water jet. Extinguishing media which shall not be used for safety reasons 6. ACCIDENTAL RELEASE MEASURES **Personal precautions** Use personal protective equipment. Ventilate the area. Refer to protective measures listed in sections 7 and 8. Wear respiratory protection. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. Remove all sources of ignition. Try to prevent the material from entering drains or water ways. If the product **Environmental precautions** contaminates rivers and lakes or drains inform respective authorities. Clean with detergents. Avoid solvents. Contain and collect spillage with non-Methods for cleaning up combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

Refer to section 15 for specific national regulation.

MSDS EU 01 / EN Version 2

Print Date 6/16/2010 Revision date 29-06-09

### 7. HANDLING AND STORAGE

Handling	
Safe handling advice	: Avoid exceeding of the given occupational exposure limits (see section 8). Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application area. Avoid inhalation of vapour or mist. For personal protection see section 8.
Advice on protection against fire and explosion	: Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. When transferring from one container to another apply earthing measures and use conductive hose material. No sparking tools should be used. Operators should wear anti-static footwear and clothing and floors should be of the conducting type. Isolate from sources of heat, sparks and open flame. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. No smoking. The accumulation of contaminated rags and dry overspray, particularly in spray booth filters, may result in spontaneous combustion. Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.
Storage	
Requirements for storage areas and containers	: Observe label precautions. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and 30°C (41 - 86 F) in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heaviet than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store in accordance with the particular national regulations (see section 15).

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Components on the national list and/or the European TLV list (98/24/EC):

Components		CAS-No.	Value [mg/m <sup>3</sup> ]	Value [ppm]	Basis
Personal protective equipment

This Safety Data Sheet is based on the Safety Data Sheets obtained from the producer/manufacturer or/and internet databases and valid regulations considering hazardous substances/preparations.

Training advice:

Persons taking part in a turnover of hazardous products ought to be trained in product handling, safety and hygiene.

Drivers ought to be trained and obtain a certificate in accordance with the requirements of transport regulations (ADR).

Version: 2

#### Revision date 29.06.2009

The information contained in this safety data sheet is based on the present state of knowledge and current European and National legislation at the date of issue. The supplier reserves the right to modify data on the safety data sheet without further notice. Any change in data will normally be followed by the issue of a new safety data sheet. The user should check the date of issue and if more than 12 months have elapsed, then the data should only be used after checking with the nearest sales office of the supplier to establish that the data is still valid. As the specific conditions of use of the product are outside the suppliers control, the supplier is not reponsible for the (negative) consequences of these specific conditions of use, which are outside of the suppliers control and which are not compliant with the handling, storage and other instructions in this safety data sheet.

After all component(s) stated on the relevant Technical Data Sheet have been mixed the safety precautions mentioned on each of the component(s) safety data sheets and labels should be used in assessing the safety precautions of the mixed product.
