Producer declares that for R-phrases not mentioned in chapters 3, the entire amount of hazardous substances is below limits. For components with an occupational threshold limit value see chapter 8.

If multiple components with identical identifiers appear, these have different hazardous properties, e.g. flashpoint.

4. FIRST AID MEASURES

General advice	: When symptoms persist or in all cases of doubt seek medical advice. Never give anything by mouth to an unconscious person.
Eye contact	: Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice.
Skin contact	 Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Inhalation	 Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice.
Ingestion	: If accidently swallowed obtain immediate medical attention. Keep at rest. Do NOT induce vomiting.
Burns	: If spills on clothing catch fire, wash with plenty of water. Remove loose clothing. Do not remove clothing that has melted to the skin.Obtain medical attention.

5. FIRE-FIGHTING MEASURES

Specific hazards during fire fighting	:	As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains or water courses.
Special protective equipment for fire-fighters	:	In the event of fire, wear self-contained breathing apparatus.
Suitable extinguishing media	:	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Keep containers and surroundings cool with water spray.
Extinguishing media which shall not be used for safety reasons	:	Do NOT use water jet.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions	: Use personal protective equipment. Ventilate the area. Refer to protective measures listed in sections 7 and 8. Wear respiratory protection. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. Remove all sources of ignition.

AMERCOAT 78 HBC RESIN	
MSDS EU 01 / EN Version 2	Print Date 6/16/2010
	Revision date 29-06-09

Environmental precautions	Try to prevent the material from entering drains or water ways. If contaminates rivers and lakes or drains inform respective authoriti	1
Methods for cleaning up	 Clean with detergents. Avoid solvents. Contain and collect spillag combustible absorbent material, (e.g. sand, earth, diatomaceous ea 	e with non-
	vermiculite) and place in container for disposal according to local regulations (see section 13).	
Additional advice	Refer to section 15 for specific national regulation.	

7. HANDLING AND STORAGE

Handling

Handling		
Safe handling advice	:	Avoid exceeding of the given occupational exposure limits (see section 8). Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application area. Avoid inhalation of vapour or mist. For personal protection see section 8.
Advice on protection against fire and explosion	:	Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. When transferring from one container to another apply earthing measures and use conductive hose material. No sparking tools should be used. Operators should wear anti-static footwear and clothing and floors should be of the conducting type. Isolate from sources of heat, sparks and open flame. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. No smoking. The accumulation of contaminated rags and dry overspray, particularly in spray booth filters, may result in spontaneous combustion. Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.
Storage		
Requirements for storage areas and containers	:	Observe label precautions. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and 30° C ($41 - 86$ F) in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store in accordance with the particular national regulations (see section 15).
Advice on common storage	:	Keep away from oxidising agents and strongly acid or alkaline materials.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Personal protective equipment

General advice

Respiratory protection	 When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikly to be sufficient to control particulates and solvent vapour in all cases. In such circumstances they should wear a compressed airfed respirator during the spraying process and until such time as the particulates and solvent vapour concentration has fallen below the exposure limits.
Hand protection	 For prolonged or repeated contact use protective gloves. Barrier creams may help to protect the exposed areas of skin, they should however not be applied once exposure has occurred. Skin should be washed after contact. Use chemical resistant gloves classified under Standard EN 374: Protective gloves against chemicals and micro-organisms.
	Recommended gloves: Viton Minimum breakthrough time: 480 min
	The recommended gloves are based on most common solvent in this product.
	When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled,physicalrequirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove supplier.
Eye protection Skin and body protection Additional advice	 Chemical resistant goggles must be worn. Personnel should wear protective clothing. Skin should be washed after contact. Working clothes must not consist of textiles, which show a dangerous melting behaviour in case of fire. Workers should wear antistatic footwear.
	Defente actional completions in charten 15 fer reculations on environmental
Environmental protection	: Refer to national regulations in chapter 15 for regulations on environmental protection.
Personal protection Protective equipment	: Special work instructions
Please contact your personal pr	otection equipment supplier for further advice

10. STABILITY AND REACTIVITY

Conditions to avoid	:	Avoid temperatures above 60°C (140 F), direct sunlight and contact with sources of heat.
Hazardous reactions	:	Keep away from oxidising agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.
Hazardous decomposition products	:	In case of fire hazardous decomposition products may be produced such as: Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), dense black smoke.

11. TOXICOLOGICAL INFORMATION

Product information	 There is no data available for this product. The preparation has been assessed following the conventional method of the Dangerous Preparations Directive 1999/45/EC and classified for toxicological hazards accordingly. See Sections 3 and 15 for details.
Acute oral toxicity	: May cause nausea, abdominal spasms and irritation of the mucous membranes.
Acute inhalation toxicity	: Exposure to component solvent vapours concentration in excess of the stated occupational exposure limit may result in adverse health effects. Such as: mucous membrane irritation, respiratory system irritation, adverse effects on kidney, liver and central nervous system. Symptoms and signs: headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases loss of consciousness.
Skin irritation	Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in desiccation of the skin. The product may be absorbed through the skin. Repeated skin contact may lead to irritation and to senitization, possible with cross-sensitization to other epoxies.
Eye contact	: Irritating to eyes.

15. REGULATORY INFORMATION

The product is classified and labelled in accordance with Directive 1999/45/EC.

Hazardous components which must be listed on the label:

- xylene
- Pitch, coal tar, high-temp.
- reaction product: bisphenol-A-(epichlorhydrin) epoxy resin (number average molecularweight \leq 700)
- reaction product: bisphenol-A-(epichlorhydrin); epoxy resin (number average molecular weight 700 < MW < 1000)
- Creosote oil, acenaphthene fraction
- Distillates (coal tar), heavy oils

R-phrase(s) R45 May cause cancer. • R46 May cause heritable genetic damage. Also harmful by inhalation and in contact with skin. R20/21 R48/20 Also harmful: danger of serious damage to health by prolonged exposure through inhalation. R10 Flammable. R36/38 Irritating to eyes and skin. R43 May cause sensitization by skin contact. R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. 8/11

Harmful by inhalation and in contact with skin. Irritating to skin. Highly flammable. Harmful by inhalation. Irritating to eyes and skin. May cause sensitization by skin contact. Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Flammable. May cause cancer. May cause cancer. May cause heritable genetic damage. May impair fertility. May cause harm to the unborn child. May cause sensitization by skin contact.
this product contains a complex mixture explanation of R-phrases mentioned ylene thylbenzene eaction product: bisphenol-A- epichlorhydrin) epoxy resin (number verage molecularweight \leq 700) -methoxy-2-propanol	d in section 3 R10 R20/21 R38 R11 R20 R36/38 R43 R51/53 R10 R45 R46 R60 R61 R43	 Flammable. Harmful by inhalation and in contact with skin. Irritating to skin. Highly flammable. Harmful by inhalation. Irritating to eyes and skin. May cause sensitization by skin contact. Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Flammable. May cause cancer. May cause cancer. May cause heritable genetic damage. May impair fertility. May cause harm to the unborn child. May cause sensitization by skin contact. Very toxic to aquatic organisms, may cause long-term

AMERCOAT 78 HBC RESIN

MSDS EU 01 / EN Version 2

Print Date 6/16/2010 Revision date 29-06-09

nonylphenol	R22 R34	Harmful if swallowed. Causes burns.
	R62	Possible risk of impaired fertility.
	R63 R50/53	Possible risk of harm to the unborn child.
	R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
benz[a]anthracene	R45	May cause cancer.
	R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
benz(e)acephenanthrylene	R45 R50/53	May cause cancer.
	K30/33	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
benzo[k]fluoranthene	R45	May cause cancer.
	R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
dibenz[a,h]anthracene	R45	May cause cancer.
	R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
Naphthalene	R22	Harmful if swallowed.
	R40 R50/53	Limited evidence of a carcinogenic effect. Very toxic to aquatic organisms, may cause long-term
	100/00	adverse effects in the aquatic environment.
Quartz (SiO2) (< 5 μm)	R48/20	Harmful: danger of serious damage to health by prolonged exposure through inhalation.
2-Methylnaphthalene	R22	Harmful if swallowed.
	R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
Creosote oil, acenaphthene fraction	R45	May cause cancer.
Pitch, coal tar, high-temp.	R45	May cause cancer.
Distillates (coal tar), heavy oils	R45	May cause cancer.
reaction product: bisphenol-A-	R43	May cause sensitization by skin contact.
(epichlorhydrin); epoxy resin (number average molecular weight 700 < MW < 1000)	R36/38	Irritating to eyes and skin.
Phenanthrene	R50/53	Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
	R22	Harmful if swallowed.
Pyrene	R26	Very toxic by inhalation.
chrysene	R45 R68	May cause cancer. Possible risk of irreversible effects.
	R50/53	Very toxic to aquatic organisms, may cause long-term
		adverse effects in the aquatic environment.
benzo[e]pyrene	R45 R50/53	May cause cancer. Very toxic to aquatic organisms, may cause long-term
	KJU/JJ	adverse effects in the aquatic environment.
